

# heresay

## Brand guidelines

The mark, its construction and colour, type, the widget, voice, and how to use them. Version 1.0, September 2026.

# Every report gets a hearing.

Heresay puts a Report button in any app. Users say what is wrong, the developer rules on it, and the user hears back. The brand is built on that one promise.

## Here, say it.

Read the name one way: an invitation. Here is the place. Say it.

## ~~hearsay~~ → firsthand

Hear it the other way: hearsay is secondhand talk. Heresay is the opposite, straight from the person using the app.

The mark is a quote with a face. The quotation marks are eyes, looking up at whoever is speaking.

# One circle, six waves, two quotes.

Everything is measured from R, the radius of the base circle. The waves rise and fall by R/8. The eyes are the brand quotation mark, drawn at 1.25 and tilted 24° upward.

|        |                                                                                           |
|--------|-------------------------------------------------------------------------------------------|
| R      | Base circle radius · 74 units in a 200 box                                                |
| Waves  | 6 around the circle, depth $\pm R/8$                                                      |
| Eyes   | Two quotation marks, scale 1.25, tilted $-24^\circ$ , centres at (80, 106) and (124, 101) |
| Glance | Right eye sits 5 units higher: the face looks up and slightly right                       |
| Colour | Body Deep Peacock, eyes White                                                             |
| Source | <code>scripts/brand_geometry.py</code> · never redraw by hand                             |

# Five versions, one face.

Use the colour mark wherever you can. The others exist for grounds and processes where it will not hold.

**Colour**  
On white and light grounds. The default.

**Accent eyes**  
Where a touch of brightness helps: stickers, launch art.

**On dark**  
Dark grounds and dark mode.

**Reversed**  
On Deep Peacock: app icon, headers.

**One colour**  
Print, fax, embossing: anywhere colour cannot hold.

# Give it room to breathe.

Keep clear space of at least one eye-width (x) on every side. Nothing enters it: no text, no edges, no other marks.

## Minimum size

Screen: 16 px. Print: 6 mm. Below 24 px, use the small-size artwork, which is drawn larger inside its tile so the eyes stay open.

# Peacock, and a lot of white.

One brand colour family on neutral grounds. It is not a status colour, so it never reads as an error or a success inside someone else's app.

**Deep Peacock**  
The brand. Mark body, headlines, dark tiles.  
  
#0b5e57 • 7.6:1 on white

**Peacock**  
Actions: buttons, selected states, the widget accent.  
  
#0f766e • 5.5:1 on white

**Turquoise**  
Fill only, never text on white. Eyes, dark-mode accent.  
  
#2dd4bf • 9.5:1 on ink

**Mist**  
Tints behind peacock content.  
  
#e6f4f2 • —

**Ink**  
Text and dark surfaces.  
  
#15171c • 17.9:1 on white

**Slate**  
Secondary text.  
  
#5b6472 • 6.0:1 on white

**Line**  
Hairlines and borders.  
  
#e3e6ea • —

**Paper**  
Light surfaces.  
  
#f5f6f7 • —

● Heard

● Sustained

● Overruled

● Case closed

Status colours: green for yes, amber for a considered no. Never red: a declined report is an answer, not an error.

# Warm headlines, quiet text.

Three families, each with one job. All free on Google Fonts, so developers and the web can use them without a licence.

Aa

**Bricolage Grotesque**

Headlines and the wordmark. ExtraBold 800 and Bold 700. Its soft, slightly quirky shapes match the wavy mark.

Aa

**Figtree**

Interface and body text. 400 to 700. Friendly, very legible at small sizes.

</>

**JetBrains Mono**

Code, keys, routes and versions. 400 and 500.

|         |                                                                                            |                           |
|---------|--------------------------------------------------------------------------------------------|---------------------------|
| Display | Every report gets a hearing.                                                               | 56 / 1.05 • 800 • -0.03em |
| Heading | How it works                                                                               | 32 / 1.2 • 700            |
| Body    | Add one line to any app. Your users say what is wrong, you rule on it, and they hear back. | 17 / 1.6 • 400            |
| Code    | <script src="https://heresay.dev/sdk.js" data-key="pk_...">                                | 14 / 1.6 • 400            |

# With the name.

The wordmark is Bricolage Grotesque ExtraBold, lowercase, tracked in slightly, outlined.  
The mark is twice the height of the h; the gap is 0.18 of the mark.

Stacked, for square spaces

heresay

Wordmark alone, where the mark already appears nearby

# On the home screen.

The reversed mark on a Deep Peacock tile. At 32 px and below, the small-size artwork draws the mark larger so the eyes stay readable.

# A guest in someone else's house.

The widget lives inside other brands. It stays neutral, black and white, and uses peacock only where it matters. Developers can swap the accent for their own colour.

|          |                                                                                          |
|----------|------------------------------------------------------------------------------------------|
| Neutral  | White panel, ink text, slate hints. Nothing competes with the host's brand.              |
| Accent   | Peacock on Send, the selected type and the update dot only.                              |
| Override | <code>data-accent="#hex"</code> replaces peacock. The mark on the button stays as drawn. |
| Dark     | Follows the device: ink panel, Turquoise accent.                                         |
| Words    | Plain in the widget: Waiting, Accepted, Fixed, Declined with a reason.                   |

# The parts.

Rounded, soft and calm, like the mark. Radius 10 on controls, 16 on cards. Spacing on a 4-point grid.

## Report types

Broken

Confusing

Could be better

Idea

Reporters pick what they can judge. They never pick a priority.

## Statuses • dashboard

• Heard

• Sustained

• Overruled

• Case closed

The court words live in the dashboard. A decline is always a ruling with a reason.

## The brief

**BRIEF • SUSTAINED**

Type: broken • /export • v1.4.0

""

The export button does nothing.

""

Only sustained reports ever become a brief for a coding agent.

# Plain first, pun second.

We sound like a helpful person, not a courtroom. The legal wordplay is a wink, used where it fits exactly and never at a user's expense.

## Say

"Here, say it."

"Heard. We'll get back to you."

"Declined: it's under Settings → Plan."

"Every report gets a hearing."

## Don't

A pun in an error message

Jokes inside a decline

"Your objection is inadmissible"

Urgency theatre: "CRITICAL!!"

# Please don't.

The mark only works as drawn. Each of these breaks the face, the colour or the promise.

✗ Don't stretch it

✗ Don't rotate it

✗ Don't recolour it red

✗ Don't outline it

✗ Don't remove the eyes

✗ Don't swap the eyes

✗ Don't add effects

✗ Don't use low contrast

# Where everything lives.

Everything is generated from one geometry file. Start from the source, never redraw.
